

Attendees: Lauren Reyes, Ryan McBride, Abdul Abdullahi, Nick Dossin, Antonya de Silva

Key Action Points:

- Prepare for Data Digest
 - How will we sort and evaluate the data obtained from our interviews and surveys?
 - What methods of analysis are we going to use to internalize our insights?
 - We need to create a plan to effectively transition from bringing in the information from the clients we meet with, and how we are going to store and categorize our data.
 - Identifying what steps need to be taken now will make it much easier to understand the data and have everyone on the same page about where we are with the development of our personas.

Key Discussion Points:

- Emphasis on understanding service providers' everyday experiences
- Demographic questions should include the following:
 - Place of origin
 - Duration of residence in PG county
 - Years of experience as a service provider
- Usability Questions
 - Commonly used apps/platforms for work and personal use
 - Pain points and limitations when using technology (office vs field)
 - Trust in online resources and success rates of tools currently in use
 - Time spent searching for solutions and determining their effectiveness
 - Challenges with information overload and system silos
- Internet usage
 - Frequency and reliability
 - Methods for finding the right resources or people to connect clients with
 - Use of multiple services to engage with different communities
- Other themes
 - Gaps in communication between organizations
 - Networking and support systems for service providers
 - Technologies that clients are already familiar with
 - Ideas for future: how to tailor solutions
- Interview planning
 - Antonya to help with coordination of interviews with 5-6 service providers
 - Initial interviews to be scheduled by next week
 - Upcoming meeting will focus on developing user personas for future project stages

Next Steps

- We will meet with Antonya next week to begin scheduling service provider interviews
- Continue to refine the interview script and survey tools based on today's feedback
- Develop user personas following interview insights
- Prepare deliverable for review in future sprints
