OUR CLIENT Center for Community Engagement

- Serves as a bridge between the university and local communities to address social challenges and promote civic engagement
- Connects students, staff, and community members to service projects and community-based programs

2 Problem Statement & Methodology

Center for Community Engagement

Problem Statement

The Center for Community Engagement is dedicated to connecting community members with essential resources, but the number of current resources utilized by community service providers can be overwhelming and inconsistent in providing information.

Initial Requirements

Analyzing the workflows & tools
used by service providers

Develop 4 user personas that
represent the diverse needs of
these providers

Provide platform
recommendations based on
findings

Our Process

Followed 1-week sprint timeline for 10 weeks

Collaboration & Communication	Mondays, & Wednesdays In-Class Meetings (Team)	Every other Tuesday Client Check-In	Mondays TA Team Check-In
Task Evaluation (JIRA + GitHub)	Defining Tasks Ready for Work Definition of Done		
Research Timeline	Review Background Resesarch Materials → Develop Survey Questions and Interview Script → Review Data from Results and Develop Personas		

3 Development

Research Question

What are the key types of service providers in Prince George's County, what services do they offer, what challenges do they face, and what factors influence their effectiveness and decision making?

1. Users life that isn't directly attached to the work
 - a. Language
 - b. Access to internet and technology
 - c. Personal demographics
2. How long have you lived in Prince George's County?
3. How long have you been in public service or non-profit sector?
4. How long have you been in your current position?
5. What role do you play in your organization?
6. What online tools or platforms do you use in your everyday life?
7. What challenges do you face when using technology in your job?
8. How long do you search for a solution until you choose one or give up?
9. How long does it typically take you to find a resource or solution for your clients?
10. What solutions have you sought out to solve this challenge?
11. What are the current limitations in using technology in the office vs in the field?
12. Do you use more than one service or platform to connect with more than one community?
13. How do you find the resources that are available to your clients?
14. What challenges do you have in finding resources that are available to your clients
15. How do you assess trustworthiness in resources that you find or recommend?
16. How do you get feedback from clients or colleagues?
17. How do you stay connected with your colleagues and peers?
18. What kind of support would make your job easier?
19. What technologies are your clients most familiar with?

4 Final Result & Next Steps

Provider perspectives: Exploring workflows, tools, and challenges

Are you a service provider in Prince George's County? Help our student researchers learn: What...

 umdsurvey.umd.edu

Survey Demo

- Created a survey for local service providers
- Data will inform the development of service provider personas

Next Steps

- Distribute the survey to service providers in the area
- Gather data on their roles, needs, and challenges
- Use collected data as the foundation for creating service provider personas

5

Team Review

Reflection

- Progress Made: Developed research questions and designed a survey to gather insights for user personas.
- Challenges Faced: Unable to finalize personas due to time constraints.
- Next Steps for Future Team:
 - Distribute and analyze the survey data.
 - Create detailed user personas based on findings.
- Key Takeaway: Our work establishes a foundation to ensure user needs guide the platform's development.
